Independent Auditors' Report

To the Board of Directors of
Bexar County Water Control and Improvement District No. 10

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of the Bexar County Water Control and Improvement District No. 10 (District), as of and for the years ended December 31, 2021 and 2020, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the District as of December 31, 2021 and 2020, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (GAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the District and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and GAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and GAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the required supplementary information, as listed in the table of contents be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Management is responsible for the Texas Supplementary Information as listed in the table of contents. The Texas Supplementary Information comprises other information but does not include the basic financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated February 23, 2022 on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Bexar County Water Control and Improvement District No. 10

Management's Discussion and Analysis - Unaudited
December 31, 2021 and 2020

As management of Bexar County Water Control and Improvement District No. 10 (the District), we offer readers the following discussion and analysis of the District's financial activities for the calendar years ended December 31, 2021 and 2020. The MD&A should be read in conjunction with the accompanying basic financial statements.

The District was recognized by the Texas Commission on Environmental Quality (TCEQ) as the Outstanding Public Drinking Water System of the Year in 2012. This award is presented once every two years to two systems out of over 7,000 public drinking water systems in the State. The District was also recognized as a Superior Water System by the TCEQ in 2011. The criterion for either award is comprehensive and includes compliance with water quality standards, financial stability, customer service, capacity development and physical plant capabilities. We are proud of the service we provide and proud to receive the recognition from our peers.

Overview of the Financial Statements

The management's discussion and analysis is intended to serve as an introduction to the District's basic financial statements and is comprised of three components: (1) financial statements, (2) notes to the financial statements and (3) required supplementary information.

Basic Financial Statements

The District maintains a single enterprise fund. This fund is presented in the statements of net position, the statements of revenues, expenses and changes in net position and the statements of cash flows.

The statement of net position presents all of the District's assets, deferred outflows of resources, liabilities and deferred inflows of resources, with the difference being reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The statement of revenues, expenses and changes in net position reports how the District's net position changed during the most recent calendar year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will result in cash flows in future fiscal periods.

The statement of cash flows reflects cash receipts and payments for operating, noncapital financing, capital and related financing and investing activities for the years presented.

Notes to the Financial Statements

The accompanying notes provide additional information essential to a full understanding of the data provided in the financial statements.

Required Supplementary Information (RSI)

The accompanying RSI provide historical information on the defined benefit pension plan including changes in net pension liability, annual contributions and notes to the RSI.

Other Information

In addition to the basic financial statements, accompanying notes and RSI, this report also presents various statistical and financial data for the District as other information required by the Texas Commission on Environmental Quality.

Bexar County Water Control and Improvement District No. 10

Management's Discussion and Analysis - Unaudited
December 31, 2021 and 2020

Financial Highlights

2021

The assets and deferred outflows of resources of the District exceed its liabilities and deferred inflows of resources by \$8,244,626 (net position) for the fiscal year reported. This is a decrease of \$28,860 from the prior year.

Total net position is comprised of the following:

1. Net investment in capital assets in the amount of \$5,929,876 includes all property and equipment owned by the District, net of accumulated depreciation.
2. Net position restricted for net pension asset in the amount of \$38,998 includes the difference between the pension plan's net position and the actuarially calculated pension liability.
3. Net position restricted for debt service in the amount of \$162,500 includes the difference between the restricted debt service cash and restricted interest payable.
4. Unrestricted net position of \$2,113,252 represents the portion available to fund the District's operations.

Operating revenues increased by \$180,436, an increase of 7 percent from calendar year 2020. Water revenue increased 3 percent due to a 19 percent increase in water rates effective in late February of 2021 offset by a decrease in consumption of 7 percent. Sewer revenues increased 12 percent due to a 13 percent increase in wastewater treated and a small increase in rates.

Operating expenses increased by \$299,918, an increase of 13 percent from calendar year 2020. Depreciation expense increased by \$151,749, an increase of 47 percent from calendar year 2020 due to projects completed at the end of calendar year 2020 being depreciated for the full calendar year in 2021. Wastewater services expense increased by \$100,258, an increase of 12 percent due to an increase in wastewater treated.

2020

The assets and deferred outflows of resources of the District exceed its liabilities and deferred inflows of resources by \$8,273,486 (net position) for the fiscal year reported. This is an increase of \$244,202 from the prior year.

Total net position is comprised of the following:

1. Net investment in capital assets in the amount of \$6,095,798 includes all property and equipment owned by the District, net of accumulated depreciation.
2. Net position restricted for net pension asset in the amount of \$71,379 includes the difference between the pension plan's net position and the actuarially calculated pension liability.
3. Net position restricted for debt service in the amount of \$124,476 includes the difference between the restricted debt service cash and restricted interest payable.
4. Unrestricted net position of \$1,981,833 represents the portion available to fund the District's operations.

Operating revenues increased by \$207,672, an increase of 9 percent from calendar year 2019. Water revenue increased 15 percent due to a 19 percent increase in water rates effective in late February of 2020. Sewer revenues increased 3 percent due to no change in usage and a small increase in rates.

Bexar County Water Control and Improvement District No. 10

Management's Discussion and Analysis - Unaudited
December 31, 2021 and 2020

Operating expenses decreased by \$13,559, a decrease of 1 percent from calendar year 2019.

Financial Analysis

The District's net position at calendar year end is \$8,244,626. This is a \$28,860 decrease over last year's net position of \$8,273,486. The following table provides a summary of the District's net position at December 31:

	Summary of Changes in Net Position Business-Type Activities			2021-2020 Amount Change	Percent Change

Bexar County Water Control and Improvement District No. 10

Management's Discussion and Analysis - Unaudited
December 31, 2021 and 2020

2021 had slightly more rainfall in the fall as compared to 2020. The aquifer slightly increased its level in 2021 to 665 feet from 663 at the end of 2020. This resulted in a 7 percent decrease in water consumption offset by a 19 percent increase in rates for overall increased revenues.

2020 had slightly less rainfall in the fall as compared to 2019. The aquifer slightly decreased its level in 2020 to 663 feet from 672 at the end of 2019. This resulted in a slight increase in water consumption as well as a 19 percent increase in rates for overall increased revenues.

Bexar County Water Control and Improvement District No. 10

Management's Discussion and Analysis - Unaudited
December 31, 2021 and 2020

Although revenues exceeded budget in 2021, the District's rate structure ensures that its financial objectives are achieved. With only necessary rate adjustments the District will be able to meet its objectives of creating enough revenue to ensure day-to-day operations are adequately funded, charge premium rates high enough to discourage waste and generate enough revenue to meet its long-term strategic objectives.

While on the subject of rates, it should be noted that annual rate adjustments, while unpopular, should be recognized as a necessary evil. The cost of providing service is on the rise on all fronts. Personnel costs grow with seniority of staff (cost of living, longevity, promotions, insurance, etc.), equipment cost (purchase and maintenance) go up, regulatory expenses creep up, utility costs go up because of their increased cost of doing business. The list is endless. In some areas such as fuel and metals, the changes can be explosive. Failing to systematically pursue rate increases usually results in financial uncertainty for the entity with the result it has to impose a large, and consequently very unpopular, rate increase. Or succumb to rate payer pressure to reduce the increase, thereby worsening the financial problem. It has been and remains this District's policy to pass along rate increases as expenses rise. However, not all is doom and gloom; the customers of this District still enjoy the lowest rates in the region and are only about one-half what its nearest competitor, the San Antonio Water System, charges. The Edwards Aquifer Authority (EAA) Fees were adjusted to meet requirements.

Investment returns in 2021 decreased from 2020, \$6,141 versus \$20,410. The District had \$835,269 invested in certificates of deposit in 2021, which was an increase of \$499,902 from 2020. Inflation increased to 7 percent for the year compared to 1.4 in 2020. The District's options are limited by the State's public investment rules.

Management's Discussion and Analysis - Unaudited
December 31, 2021 and 2020

Financial Analysis of the District's Operations

2021

For the calendar year ended December 31, 2021, the District has an overall positive net position of \$8,244,626. Of this year-end total, \$2,113,252 is unrestricted, indicating availability for continuing service requirements. This year's decrease in net position was \$28,860.

2020

For the calendar year ended December 31, 2020, the District has an overall positive net position of \$8,273,486. Of this year-end total, \$1,981,833 is unrestricted, indicating availability for continuing service requirements. This year's increase in net position was \$244,202.

Capital Assets

2021

The District's investment in capital assets, net of accumulated depreciation, as of December 31, 2021, was \$12,931,332. The total decrease in this net investment was 2 percent. See Note 3 (on pages 20-21) for additional information about changes in capital assets during the calendar year.

2020

The District's investment in capital assets, net of accumulated depreciation, as of December 31, 2020, was \$13,246,595. The total increase in this net investment was 52 percent. See Note 3 (on pages 20-21) for additional information about changes in capital assets during the calendar year.

In 2020, the District completed the construction on phase I and II of the water and sewer system improvements and the District fire hydrant project.

Long-Term Debt

As of December 31, 2021, the District has a total revenue debt of \$6,720,000 outstanding compared to \$6,855,000 in 2020. In 2019, the District issued Revenue Notes 2019A and 2019B for \$4,950,000 and \$1,990,000, respectively, for financing improvements to the system.

Bexar County Water Control and Improvement District No. 10

Management's Discussion and Analysis - Unaudited
December 31, 2021 and 2020

Budget, Economic Environment and Projected Projects

One of the long-term objectives of this District is to continue rehabilitating and upgrading our water and wastewater infrastructure. To do this the District hired Leonard Young of Young Professional Services as the District's Engineer and instructed the engineer to do a study to determine the areas the District needed to upgrade.

The engineer recommended approximately \$12.5 million dollars of improvements required to maintain the current system. It was determined that approximately \$7 million dollars was needed immediately to upgrade the electrical controls at Well #3 and Well #4 and replace aging water mains that were in need of constant repair.

The District sought recommendations from Bond Council and a rate consultant to determine the best way to fund these projects and how it would impact rates. The rate consultant, who worked with a volunteer committee, recommended a five-year rate increase structure to fund the \$7 million dollars of improvements needed. The Board adopted the five-year rate increase recommended by the rate consultant and committee to be effective every February 23, 2018 for the next 5 years.

At the Board's request, the District's Engineer worked with District staff to develop a \$7 million dollars improvement plan and obtain the Texas Commission on Environmental Quality (TCEQ) approval. Upon receiving TCEQ approval, the Board instructed Bond Council to sell approximately \$7 million dollars in Revenue Notes to fund the improvement plan.

Once financing was secured, the District's Engineer went out for bids on Phase I projects, which consisted of approximately \$5 million dollars of improvements. The contracts were awarded and in 2020, Phase I and Phase II projects were completed and placed into service.

The Board has established a water and sewer rate to meet all debt and provide money for future CIP projects. At the end of our five-year rate increases the District will consult with a rate consultant again to determine if a rate increase is needed to maintain the District's financial goals set out by the Board.

Contacting the District's Financial Management

This report is designed to provide the board of directors, citizens, customers, bond rating agencies, investors and creditors with a general overview of the District's finances and to show the District's accountability for the money it receives. If you have questions about this report or need additional financial information, contact: General Manager, Bexar County Water Control and Improvement District No. 10, 8601 Midcrown Drive, Windcrest, TX 78239 or call 210 655 2888.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

1. Summary of Significant Accounting Policies

The financial statements of the District have been prepared in conformity with accounting principles generally accepted in the United States of America as applied to enterprise funds of governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard setting body for establishing governmental accounting and financial reporting principles.

The significant accounting principles and policies utilized by the District are described below.

Reporting Entity

Bexar County Water Control and Improvement District No. 10 (the District) is a governmental agency that was created by an order of the Texas Water Rights Commission on November 28, 1955 under Section 59 of Article 16 of the Texas Constitution and operates under Chapter 49 of the Texas Water Code.

The creation of the District was confirmed by the electorate of the District at a confirmation election held on February 4, 1956. The board of directors (board) held its first meeting on January 17, 1956 and the first bonds were sold on January 1, 1958.

The District is governed by an elected board of directors. As a water district, it is not controlled by, or dependent upon, any other entity, and does not exercise control over operations of any other entity.

Measurement Focus, Basis of Accounting and Financial Statement Presentation

The financial statements of the District are reported using the economic resources measurement focus and the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recorded when the liability is incurred or economic asset used. Revenues, expenses, gains, losses, assets, deferred outflows, deferred inflows and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes place.

Preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources and Net Position

Deposits and Investments

For purposes of the statement of cash flows, cash and cash equivalents have original maturities of three months or less.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

The District may invest its excess funds in any instruments authorized by the Public Funds Investment Act of Texas (PFIA). The District is allowed to invest in: (1) obligations of the United States or its agencies and instrumentalities; (2) direct obligations of the State of Texas or its agencies; (3) other obligations, the principal of and interest on which are unconditionally guaranteed or insured by the State of Texas or the United States; (4) obligations of states, agencies, counties, cities and other political subdivisions of any state having been rated as to investment quality by a nationally recognized investment rating firm and having received a rating of not less than AA or its equivalent; (5) certificates of deposit issued by state and national banks domiciled in Texas that are guaranteed or insured by the Federal Deposit Insurance Corporation or its successor, or secured by obligations mentioned above or credit unions that are guaranteed by the National Credit Union Association; and (6) fully collateralized direct repurchase agreements having a defined termination date.

The District has adopted an investment policy. That policy follows the state statute for allowable investments. For the years ended December 31, 2021 and 2020, the District invested strictly in certificates of deposit and investment pools. The investment pool is recorded at amortized cost without any limitations or restrictions on withdrawals.

Accounts Receivable

All receivables are reported at gross values. There is no estimate for uncollectible amounts for water and wastewater accounts as the District has not had a history of uncollectible amounts.

Inventory

Inventory consists primarily of equipment and small parts that are used in the repair and maintenance of the District's existing gathering and distribution systems. The inventory is stated at the lower of cost (first-in, first-out method) or market value.

Restricted Assets

Mandatory segregations of assets are presented as restricted assets. Such segregations are required by bond agreements and other external parties. Current liabilities payable from these restricted assets are so classified. The following accounts are reported as restricted assets:

Debt service -	Used to segregate resources accumulated for debt service payments over the next twelve months.
Construction -	Used to report debt proceeds restricted for use in construction.
Customer deposits -	Used to segregate resources accumulated for deposits to be refunded to customers.

Preliminary Survey and Investigation

The balance represents initial project engineering costs related to District plant construction. The balance will be capitalized upon commencement of the project.

Capital Assets

Capital assets, which include land, water rights, gathering and distribution systems, machinery, equipment, and vehicles are reported in the District's financial statements. Capital assets are defined by the District as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year. When capital assets are purchased, they are capitalized and depreciated in the financial statements.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

Capital assets are valued at cost where historical records are available and at an estimated cost where no records exist. Donated capital assets are valued at their estimated acquisition value at the date of donation. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Improvements to capital assets that materially extend the life of the asset or add to the value are capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Capital assets are depreciated over their useful lives on a straight-line basis as follows:

	<u>Years</u>
Gathering and distribution systems	10 - 40
Machinery and equipment	10
Vehicles	5

Deferred Outflow of Resources

A deferred outflow of resources represents a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expense) until that future time.

Accrued Expenses

Accrued expenses consists of accrued assessments and benefit related liabilities.

Customer Deposits

This account represents amounts received from new or delinquent customers. Deposits are refunded to the customer or credited to the customer's account after 12 months of good payment history or upon termination of services. The District does not pay interest on deposits. The corresponding cash is shown as restricted for customer deposits.

Compensated Absences

All full-time employees are entitled to certain compensated absences based on their length of employment. With minor exceptions, compensated absences for sickness do not vest or accumulate and are recorded as an expense when they are paid. Compensated absences for vacation pay and compensated time do have a vesting portion based on hours accumulated times the current rate of pay to be paid upon retirement, release from employment or resignation. A liability for this amount is reflected in the financial statements.

Pension Plan

The District provides pension benefits for all its full-status employees through the Texas County and District Retirement System (TCDRS). For purposes of measuring the net pension liability (asset), deferred outflows of resources and deferred inflows of resources related to pension and pension expense, information about the fiduciary net position of the TCDRS and additions to/deductions from TCDRS' fiduciary net position have been determined on the same basis as they are reported by TCDRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms, investments are reported at fair value.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

Long-Term Obligations

Long-term debt and other obligations are reported as District liabilities. Revenue note premiums and discounts, are amortized over the life of the notes using effective interest method. Gains or losses on prior refundings are amortized over the remaining life of the old debt or the life of the new debt, whichever is shorter. The balance at year-end for premiums and discounts is shown as an increase or decrease in the liability section of the statement of net position.

Deferred Inflows of Resources

A deferred inflow of resources represents an acquisition of net position that applies to a future period and therefore will not be recognized as an inflow of resources (revenue) until that future time.

Net Position

GASB No. 34 requires the classification of net position into three components - net investment in capital assets, restricted and unrestricted. These classifications are defined as follows:

Net Investment in Capital Assets - This component of net position consists of capital assets, including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes or other borrowings that are attributable to the acquisition, construction or improvement of those assets. If there are significant unspent related debt proceeds at year-end, the portion of the debt attributable to the unspent proceeds are not included in the calculation of net investment in capital assets. Rather, that portion of the debt is included in the same net position component as the unspent proceeds.

Restricted - This component of net position consists of constraints placed on net position use through external constraints imposed by creditors (such as through debt covenants), grantors, contributors or laws or regulations of other governments or constraints imposed by law through constitutional provisions or enabling legislation.

Unrestricted Net Position - This component of net position consists of net positions that do not meet the definition of "restricted" or "net investment in capital assets."

When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources as they are needed.

Revenues and Expenses

The District distinguishes operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the District's principal ongoing operations. The principal operating revenues of the District are charges for water and wastewater services. Operating expenses for the District include the cost of goods and services, administrative expenses and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Charges for Services

Billings are rendered and recorded monthly based on metered usage. The District does not accrue revenues beyond billing dates.

Current water rates were approved by the board effective February 23, 2021.

Current wastewater rates were approved by the board effective February 23, 2021.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

Connection Fee

The District charges new customers a connection fee to connect to the system. Fees collected are recorded as capital contributions on the statements of revenues, expenses and changes in net position.

Effect of New Accounting Standards on Current Period Financial Statements

GASB has approved the following:

- GASB Statement No. 87, *Leases*,
- Statement No. 91, *Conduit Debt Obligations*,
- Statement No. 92, *Omnibus 2020*,
- Statement No. 93, *Replacement of Interbank Offered Rates*,
- Statement No. 94, *Public-Private and Public-Public Partnerships and Availability Payment Arrangements*
- Statement No. 96, *Subscription-Based Information Technology Arrangements*
- Statement No. 97, *Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans - an amendment of GASB Statements No. 14 and No. 84, and a supersession of GASB Statement No. 32.*

When they become effective, application of these standards may restate portions of these financial statements.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

2. Cash and Investments

	Carrying Value		Risks
	2021	2020	
Checking and savings	\$ 1,320,950	\$ 1,641,883	Custodial credit
TexPool investment pool	114	305,347	Credit
Certificates of deposit	835,269	335,367	Custodial credit
Total	\$ 2,156,333	\$ 2,282,597	

Deposits in each local and area bank are insured by the FDIC in the amount of \$250,000 for time and savings accounts (including NOW accounts) and \$250,000 for demand deposit accounts (interest-bearing and noninterest-bearing). In addition, if deposits are held in an institution outside of the state in which the government is located, insured amounts are further limited to a total of \$250,000 for the combined amount of all deposit accounts.

Deposits in credit unions are insured by the National Credit Union Administration in the amount of \$250,000 for all share draft accounts and \$250,000 for all share certificate and regular share accounts as of December 31, 2021 and 2020.

Custodial Credit Risk

Custodial credit risk is the risk that in the event of a bank failure, the District's deposits may not be returned or the District will not be able to recover collateral securities in the possession of an outside party. The District's policy requires deposits to be collateralized by securities pledged by the District's agent, the District's financial institution or the financial institution's trust department, less the amounts of the Federal Deposit Insurance Corporation insurance (FDIC) and the National Credit Union Administration (NCUA). The board approves and designates all authorized depository institutions.

The District's total deposits at banks as of December 31, 2021 and 2020 was \$2,169,165 and \$2,059,124, respectively. In addition, the utility has collateral or depository agreements in the amount of \$1,478,159 and \$1,622,176 at December 31, 2021 and 2020, respectively. No deposits were exposed to custodial credit risk as of December 31, 2021 and 2020.

Credit Risk

Credit risk is the risk that an insurer or other counterparty to an investment will not fulfill its obligations. Investing is performed in accordance with the investment policies adopted by the board of directors in complying with state statutes. State law limits investments in investment pools to those continuously rated no lower than AAA or an equivalent rating by at least one nationally recognized rating service. The District's investment policy does not further limit its investment choices. As of December 31, 2021 and 2020, the District's pooled investments were rated AAA by Standard and Poor's.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

3. Capital Assets

A summary of capital assets for the years ended December 31, 2021 and 2020 are as follows:

4. Employees' Retirement System

Plan Description

The District provides retirement, disability and death benefits for all of its full-time employees through a nontraditional defined benefit pension plan in the statewide Texas County and District Retirement System (TCDRS). The board of trustees of TCDRS is responsible for the administration of the statewide agent multiple-employer public employee retirement system consisting of 656 nontraditional defined benefit pension plans. TCDRS in aggregate issues a comprehensive annual financial report (CAFR) on a calendar year basis. The most recent comprehensive annual financial report for TCDRS can be found at the following link, www.tcdrs.org.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

Benefits Provided

All full- and part-time nontemporary employees participate in the plan, regardless of the number of hours they work in a year. Employees in a temporary position are not eligible for membership. The plan provides retirement, disability and survivor benefits. TCDRS is a savings-based plan. For the District's plan, 7 percent of each employee's pay is deposited into his or her TCDRS account. By law, employee accounts earn 7 percent interest on beginning of year balances annually. At retirement, the account is matched at an employer set percentage (current match is 100 percent) and is then converted to an annuity. There are no automatic COLAs. Each year, the District may elect an ad hoc COLA for its retirees (if any). There are two COLA types, each limited by actual inflation.

Employees Covered by Benefit Terms

At the valuation and measurement date, the following employees were covered by the benefit terms as of December 31:

	<u>2020</u>	<u>2019</u>
Inactive employees or beneficiaries currently receiving benefits	5	5
Inactive employees entitled to but not yet receiving benefits	3	2
Active employees	<u>7</u>	<u>7</u>
Total	<u>15</u>	<u>14</u>

Contributions

The contributions rates for employees in TCDRS are either 4 percent, 5 percent, 6 percent or 7 percent of employees' gross earnings, as adopted by the employer's governing body. Participating employers are required to contribute at actuarially determined rates to ensure adequate funding for each employer's plan. Employer contribution rates are determined annually and approved by the TCDRS Board of Trustees. The employee deposit rate and the employer contribution rate may be changed by the governing body of the employer within the options available to the TCDRS Act.

The District has elected the variable rate plan provisions of the TCDRS Act. The plan is funded by monthly contributions from both employee members and the employer, based on the covered payroll of employee members. Under the TCDRS Act, the contribution rate of the employer is actuarially determined annually. The District contribution rate is based on the TCDRS funding policy adopted by the TCDRS Board of Trustees and must conform with the TCDRS Act. The District contributed using the actuarially determined rate of 7 percent for the 2021 and 2020 calendar years. The employee contribution rates are set by the District and are 7.0 percent for the 2021 and 2020 calendar years.

Net Pension Liability (Asset)

The District's Net Pension Liability (Asset) (NPL/NPA) recorded as of December 31, 2021 and 2020 was measured as of December 31, 2020 and 2019, respectively, and the Total Pension Liability (Asset) (TPL/TPA) used to calculate the Net Pension Liability (Asset) was determined by an actuarial valuation as of that date. The December 31, 2020 actuarial valuation is the most recent valuation.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

Actuarial Valuation Information

The Total Pension Liability (Asset) in the December 31, 2020 and 2019 actuarial valuations were determined using the following actuarial assumptions:

	2020	2019
Actuarial valuation dates	December 31, 2020	December 31, 2019
Actuarial cost method	Entry Age	Entry Age
	Level Percentage of Payroll,	Level Percentage of Payroll,
Amortization method	Closed	Closed
Amortization period	20.0 Years	0.0 Years
Asset valuation method	5 Year Smoothed Market	5 Year Smoothed Market
Actuarial assumptions:		
Investment Return*(includes administrative expenses)	7.5%	8%
Projected salary increases*	4.6%	4.9%
Inflation	2.5%	2.75%
Cost of living adjustments	0%	0%

*Includes inflation at the stated rate.

The annual salary increase rates assumed for individual members vary by length of service and by entry-age group. The annual rates used to measure the Total Pension Liability (Asset) as of December 31, 2020 consist of a general wage inflation component of 3.0 percent (made up of 2.5 percent inflation and 0.5 percent productivity increase assumptions) and a merit, promotion and longevity component that on average approximates 1.6 percent per year for a career employee. The annual rates used to measure the Total Pension Liability (Asset) as of December 31, 2019 consist of a general wage inflation component of 3.25 percent (made up of 2.75 percent inflation and 0.5 percent productivity increase assumptions) and a merit, promotion and longevity component that on average approximates 1.6 percent per year for a career employee.

Mortality rates for active members were based on gender-distinct RP2014 Active Employee Mortality Table, projected with 110 percent of the MP-2014 Ultimate scale after 2014. Mortality rates for retirees, beneficiaries, and nonactive members were based on the gender-distinct RP2014 Healthy Annuitant Mortality Table, projected with 110 percent of the MP-2014 Ultimate scale after 2014. For disabled annuitants, the gender-distinct RP2014 Disabled Annuitant Mortality Table is used, projected with 110 percent of the MP-2014 Ultimate scale after 2014.

The long-term expected rate of return on pension plan investments used to measure the Total Pension Liability (Asset) as of December 31, 2020 and 2019 was 7.5 and 8.0 percent. The pension plan's policy in regard to the allocation of invested assets is established and may be amended by the TCDRS Board of Trustees. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income, in order to satisfy the short-term and long-term funding needs of TCDRS.

The long-term expected rate of return on TCDRS assets is determined by adding expected inflation to expected long-term real returns, and reflecting expected volatility and correlation. The valuation assumption for long-term expected return is re-assessed at a minimum of every four years, and is set based on a 30-year time horizon; the most recent analysis was performed in 2017.

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

The capital market assumptions and information are provided by TCDRS's investment consultants, Cliffwater LLC. The numbers shown are based on January 2021 information for a 10-year time horizon.

<u>Asset Class</u>	<u>Target Allocation⁽¹⁾</u>	<u>Geometric Real Rate of Return (Expected Minus Inflation)⁽²⁾</u>
U.S. equities	11.50 %	4.25 %
Global equities	2.50	4.55
International equities, developed	5.00	4.25
International equities, emerging	6.00	4.75
Investment-grade bonds	3.00	-0.85
Strategic credit	9.00	2.11
Direct lending	16.00	6.70
Distressed debt	4.00	5.70
REIT equities	2.00	3.45
Master Limited Partnerships (MLPs)	2.00	5.10
Private real estate partnerships	6.00	4.90
Private equity	25.00	7.25
Hedge funds	6.00	1.85
Cash equivalents	2.00	-0.70
Total	<u>100.00 %</u>	

(1) Target asset allocation adopted at the March 2021 TCDRS Board meeting.

(2) Geometric real rates of return equal the expected return minus the assumed inflation rate of 2.0 percent, per Cliffwater's 2021 capital market assumptions.

Discount Rate

A single discount rate of 7.6 and 8.1 percent was used to measure the Total Pension Liability (Asset) as of December 31, 2020 and 2019. This rate reflects the long-term assumed rate of return on assets for funding purposes of 7.50 and 8.00 percent, net of all expenses, increased by 0.10 percent to be gross of administrative expenses. The projection of cash flows used to determine the discount rate assumed that employee and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability (Asset).

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

Changes in the Net Pension Liability (Asset) for the Years Ended December 31, 2021 and 2020 are as follows:

	2021		
	Total Pension Liability (a)	Increase (Decrease) Plan Fiduciary Net Position (b)	Net Pension Liability (Asset) (a) - (b)

Sensitivity of the Net Pension Liability (Asset) to Changes in the Discount Rate

The following presents the net pension liability (asset) of the District, calculated using the discount rate of 7.6 percent, as well as what the District's net pension liability (asset) would be if it were calculated using a discount rate that is 1-percentage-point lower (6.6 percent) or 1-percentage-point higher (8.6 percent) than the current rate:

	2021		
	1% Decrease in Discount Rate (6.6%)	Discount Rate (7.6%)	1% Increase in Discount Rate (8.6%)
Total pension liability	\$ 885,234	\$ 791,581	\$ 713,029
Fiduciary net position	830,579	830,579	830,579
District's net pension liability (asset)	\$ 54,655	\$ (38,998)	\$ (117,550)

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

The following presents the net pension liability (asset) of the District, calculated using the discount rate of 8.1 percent, as well as what the District's net pension liability (asset) would be if it were calculated using a discount rate that is 1-percentage-point lower (7.1 percent) or 1-percentage-point higher (9.1 percent) than the current rate:

	2020		
	1% Decrease in Discount Rate (7.1%)	Discount Rate (8.1%)	1% Increase in Discount Rate (9.1%)
Total pension liability	\$ 767,550	\$ 689,660	\$ 623,841
Fiduciary net position	761,039	761,039	761,039
District's net pension liability (asset)	<u>\$ 6,511</u>	<u>\$ (71,379)</u>	<u>\$ (137,198)</u>

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's Fiduciary Net Position is available in a separately-issued TCDRS financial report. That report may be obtained on the Internet at www.tcdrs.org.

Pension Expense

For the years ended December 31, 2021 and 2020, the District recognized pension expense of \$(38,801) and \$(41,764), respectively.

Deferred Outflows and Inflows of Resources Related to Pensions

At December 31, 2021, the District reported deferred outflows and inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual economic experience	\$ 21,255	\$ 59,343
Changes in actuarial assumptions	31,096	71
Net differences between projected and actual investment earnings	-	28,804
Contributions subsequent to the measurement date	12,795	-
Total	<u>\$ 65,146</u>	<u>\$ 88,218</u>

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

At December 31, 2020, the District reported deferred outflows and inflows of resources related to pensions from the following sources:

	<u>Deferred Outflows of Resources</u>	<u>Deferred Inflows of Resources</u>
Differences between expected and actual economic experience	\$ 20,373	\$ 118,686
Changes in actuarial assumptions	1,260	142
Differences between projected and actual investment earnings	-	19,644
Contributions subsequent to the measurement date	<u>9,790</u>	<u>-</u>
Total	<u>\$ 31,423</u>	<u>\$ 138,472</u>

The following table presents the future amortization of deferred outflows and deferred inflows of resources, excluding the balance attributable to the employer's contribution to the plan in the current calendar year and subsequent to the net pension liability (asset) measurement date. The deferred outflows of resources balance for such contribution amounts at the end of the calendar year are recognized fully as adjustments to the net pension liability in the subsequent calendar year.

Years ended December 31:	
2022	\$ (49,578)
2023	16,361
2024	813
2025	(3,463)
Thereafter	<u>-</u>
Total	<u>\$ (35,867)</u>

5. Contingencies

The District is exposed to various risks of loss related to torts; theft of; damage to, and destruction of assets, error and omissions; injuries to employees and natural disasters for which the District carries commercial insurance. Settled claims have not exceeded the commercial liability in any of the past three years. There were no significant reductions in coverage compared to the prior year.

6. Long-Term Obligations

Revenue Notes

The following notes have been issued:

<u>Date</u>	<u>Purpose</u>	<u>Final Maturity</u>	<u>Interest Rate</u>	<u>Original Amount</u>	<u>Outstanding Amount 12/31/21</u>
3/27/2019	Improvements to the system	3/1/2043	4.0%	\$ 4,950,000	\$ 4,755,000
12/5/2019	Improvements to the system	3/1/2043	5.0	1,990,000	1,965,000

Bexar County Water Control and Improvements District No. 10

Notes to Financial Statements
December 31, 2021 and 2020

Revenue notes debt service requirements to maturity follows:

	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
Year Ending December 31:			
2022	\$ 195,000	\$ 250,943	\$ 445,943
2023	205,000	242,368	447,368
2024	215,000	233,344	448,344
2025	220,000	223,994	443,994
2026	230,000	214,319	444,319

Notes to Required Supplementary Information (unaudited)
Year Ended December 31, 2021

Schedule of Contributions

Valuation Date

Actuarially determined contribution rates are calculated as of December 31, two years prior to the end of the fiscal year in which the contributions are reported.

Methods and Assumptions Used to Determine Contribution Rates

Actuarial Cost Method	Entry Age
Amortization Method	Level Percentage of Payroll, Closed
Remaining Amortization Period	20.0 Years (based on contribution rate calculated in 12/31/2020 valuation)
Asset Valuation Method	5 Year Smoothed Market
Inflation	2.5%
Salary Increases	Varies by age and service. 4.6% Including Inflation
Investment Rate of Return	7.50%, net of investment expenses, including inflation
Retirement Age	Members who are eligible for service retirement are assumed to commence receiving benefit payments based on age. The average age at service retirement for recent retirees is 61.
Mortality	130% of the RP-2014 Healthy Annuitant Mortality Table for males and 110% of the RP-2014 Healthy Annuitant Mortality Table for females, both projected with 110% of the MP-2014 Ultimate scale after 2014
Changes in Assumptions and Methods Reflected in the Schedule of Employer Contributions	2015: New inflation, mortality and other assumptions were reflected. 2017: New mortality assumptions were reflected. 2019: New inflation, mortality and other assumptions were reflected in the Schedule.
Changes in Plan Provisions Reflected in the Schedule of Employer Contributions	2015: No changes in plan provisions were reflected in the Schedule. 2016: No changes in plan provisions were reflected in the Schedule. 2017: New Annuity Purchase Rates were reflected for benefits earned after 2017. 2018: No changes in plan provisions were reflected in the Schedule. 2019: No changes in plan provisions were reflected in the Schedule. 2020: No changes in plan provisions were reflected in the Schedule.

**Independent Auditors' Report on Internal Control
Over Financial Reporting and on Compliance
and Other Matters Based on an Audit of
Financial Statements Performed in Accordance
With *Government Auditing Standards***

To the Board of Directors of
Bexar County Water Control and Improvement District No. 10

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Bexar County Water Control and Improvement District No. 10 (the District), which comprise the statement of financial position as of December 31, 2021, and the related statements of activities and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated February 23, 2022.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. We did identify certain deficiencies in internal control, described below, that we consider to be material weaknesses.

2021-001: Internal Control Over Financial Reporting

Criteria

AU-C Section 265 requires auditors to report a material weakness if the District is not able to prepare its financial statements or has material adjusting journal entries.

Condition

The auditors proposed and the District posted material adjusting journal entries in addition to the auditors preparing the annual financial statements.

Cause/Effect

Due to staffing and financial limitations, the District chose to contract with the auditors to prepare the annual financial statements. As a result, the District's financial records may be materially misstated before the annual audit is completed. In addition, the annual financial statements are not available to the District until they are completed by the auditors.

Recommendation

The board of directors needs to be aware of this condition. As a practical matter, the cost of adding staff to prepare financial statements is not feasible.

Management Response

The board of directors will continue to utilize the services of our audit firm to prepare the financial statements due to our limited staff size.

2021-002: Internal Controls - Segregation of Duties and Key Controls

Criteria

AU-C section 265 requires auditors to communicate circumstances that were determined to be significant deficiencies or material weaknesses in the District's structure of internal control.

Condition

A properly designed system of internal control includes adequate staffing as well as policies and procedures to properly segregate duties. This includes systems that are designed to limit the access or control of any one individual to the District's assets or accounting records and to achieve a higher likelihood that errors or irregularities in the District's accounting processes would be discovered by your staff in a timely manner.

At this time, due to staffing and financial limitations, the proper internal controls are not in place to achieve adequate segregation of duties.

There are also key controls, which are listed below, that are not currently in place at the District related to significant transaction cycles. These key controls are important in reducing the risk of errors or irregularities in the District's accounting processes.

- Persons processing accounts payable should be separate from those ordering or receiving goods or services.
- Persons processing payroll should be independent of other personnel duties and restricted from access to the payroll account.

- The general ledger software is not secure and does not leave an audit trail for changed or deleted transactions.
- Account reconciliations (accounts payable, retainages, payroll accruals) should be reviewed and approved by someone other than the preparer.
- There should be an appropriate system for review and approval of vendors.

Cause/Effect

Due to staffing and financial limitations, certain controls are not easily implemented by the District. Errors or irregularities could occur as part of these financial processes that may not be discovered by District staff.

Recommendation

The board of directors needs to be aware of this condition. As a practical matter, the cost of adding staff or upgrading the general ledger to eliminate segregation of duties is not feasible. We do recommend that the District establish formal reconciliations and reviews, if feasible.

Management Response

We will continue to incorporate enhancements to internal controls when practical, but acknowledge that our staff size precludes us from segregation of duties in many accounting functions.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Management's Response to the Findings

The District's written responses to the material weaknesses identified in our audit have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
